Sydney, Australia.

Subject: Application for knowing the detailed information about admission into the Master's program.

Dear Sir,

With due respect, I would like to state that I've done my graduation from the Department of Computer Science and Engineering, East West University. I recently knew about the Master's Degree program that you're offering and I would like to apply for the Master's program in Computer Science and Engineering at your University in Sydney.

During my time in the undergraduate program at East West University, I was able to develop several skills that make me a strong candidate for your Master's program including time-management skills, analytical skills, strong research, and coding skills. I think I've all the abilities for the Master's program of Computer Science and Engineering at your University in Sydney. That's what I want to know about admission information such as requirement numbers in the exam of (IELTS, TOEFL, SAT), the requirement of CGPA, total academic tuition fees, essential paper, deadline, etc. I also want to know as I'm a foreign student so what kind of international requirements need to be covered by me.

Therefore, I would be grateful if you kindly provide me with all the information about admission into the master's program at Sydney University and oblige thereby.

Yours sincerely

B M Shahria Alam
